### **Resolution LLC Gives Local Businesses Confidence to Restore Operations with Professional Ozone-Based Facility Saturation**

**Huntsville, AL, July 6, 2020** – Businesses and organizations need to ensure their spaces are safe before they can restore operations in this uncertain time. To help make sure their facilities are as pathogen-free as practicable for both their employees and their customers, local businesses are incorporating professional facility sanitization processes into their cleaning regimens.

[Resolution LLC](#), a Huntsville-based small business, recently expanded its Environmental Health & Safety services to include *Restore*, an ozone saturation service for commercial and residential buildings. “We are able to quickly assess your facility, setup our equipment, and then control and monitor everything from outside the facility. Once the treatment is complete and safe to re-enter, we can apply a disinfectant compound to high-touch surfaces, effectively forming a disinfected modified surface. This overall process is designed to be greater than 99.99% effective against the most common pathogens, and the high-touch surfaces are then pathogen-free for up to 3 months,” said Adam Butler.

The antipathogenic effects of ozone have been substantiated for several decades. Its killing action upon bacteria, viruses, fungi, and in many species of protozoa, serve as the basis for its increasing use in disinfecting municipal water supplies in cities worldwide. Ozone gas, in proper concentration, has been proven to kill the SARS coronavirus, and the structure of the new 2019-nCoV or COVID-19 is almost identical to that of the SARS coronavirus. [The National Ozone Association expects studies will show that Ozone will have an antipathogenic effect on 2019-nCoV, as well.](#)

Ozone gas can naturally oxidize its environment in a quick and efficient manner, reaching all areas of a room much more quickly and easily than manual cleaning methods. The *Restore* process is designed to supplement your normal cleaning cycle and cleaning of high-touch areas.

It is important to note that commercial-grade ozone generators should only be used by trained personnel, as the high concentration of ozone needed to kill viruses, mold, and bacteria is dangerous to humans and animals while it remains at high levels in the air.

Local businesses such as Rosie’s Mexican Cantina, Shaggy’s Burgers and Tacos, and Brindley’s Family Pharmacy of Albertville, have already incorporated the *Restore* process into their cleaning regimens. By working with Resolution’s expert *Restore* team, these businesses are re-opening more quickly with less downtime and missed revenue, and most importantly, re-opening with confidence knowing their facilities have been treated with science and an attention to detail. Clients are praising the *Restore* team and their process.

INTEGRITY | SERVICE | EXCELLENCE

“Resolution’s *Restore* process was crucial in helping us get back to a more normal routine,” said David Martin, founder of Shaggy’s Burgers and Tacos.

Martin further stated, “We had Shaggy’s restaurant treated in preparation for opening, and we are thrilled with the results. Resolution responded rapidly to our request, and they were proficient and professional. We appreciate that they have this expertise as part of their Environmental Health & Safety program.”

If you are interested in the *Restore* service, please contact Adam Butler at 256-713-8993 or [restore@resolutionhsv.com](mailto:restore@resolutionhsv.com), with a request for service. Adam will discuss the process with you and coordinate services.

#### About [Resolution LLC](#)

Resolution LLC ([resolutionhsv.com](http://resolutionhsv.com)) is a Service-Disabled Veteran-Owned Small Business, founded and located in Huntsville, Alabama, by Jon Shultz and Jeff Lower. The company’s business offerings include Environmental Health & Safety (EHS), Industrial Hygiene (IH), Geospatial Services and Geographic Information Services (GIS), and other Technical Services. Their customer base is a mix of government and commercial entities in Huntsville, across the Tennessee Valley, and from coast to coast.
